

(Sr) Biostatistician

ThromboGenics develops biopharmaceuticals focused on the development of innovative drugs for the treatment of severe diseases, including cardiovascular, ophthalmic diseases and cancer.

The Company offers now a new position for a (Sr) biostatistician to provide statistical expertise and support in the development of medicines.

The candidate (m/f) will be located at the Headquarters in Belgium (Leuven) and will report to the Chief Medical Officer.

KEY RESPONSIBILITIES:

As Biostatistician, you will be responsible of:

- Providing statistical expertise in collaboration with safety physician, clinicians and CRO'd.
- Create statistical sections for study synopses and protocols
- Defending statistical positions in interaction with regulatory authorities
- Advising on the methodological correctness and efficiency of the study design
- Preparing the statistical analysis plan
- Retrieving data from the clinical database and preparing the necessary summary reports
- SAS programming

QUALIFICATIONS/EXPERIENCE:

- MSc or PhD in Statistics or Biostatistics
- Minimum five years experience as a Biostatistician supporting pharmaceutical clinical trials and clinical development
- Wide experience with SAS programming required
- Knowledge of ICH/GCP guidelines
- Previous experience with submissions to FDA and/or European authorities
- Thorough understanding of statistical issues in clinical trials
- Confidence and ability to function independently.
- Good analytical, communication and project management skills
- Fluent in English, both in writing and speaking

WE OFFER:

- A dynamic and enthusiastic work environment in a global growing team
- A competitive salary package and benefits.
